

Exploratory Data Analysis Report - Deployment Risk Prediction

1. Dataset Overview

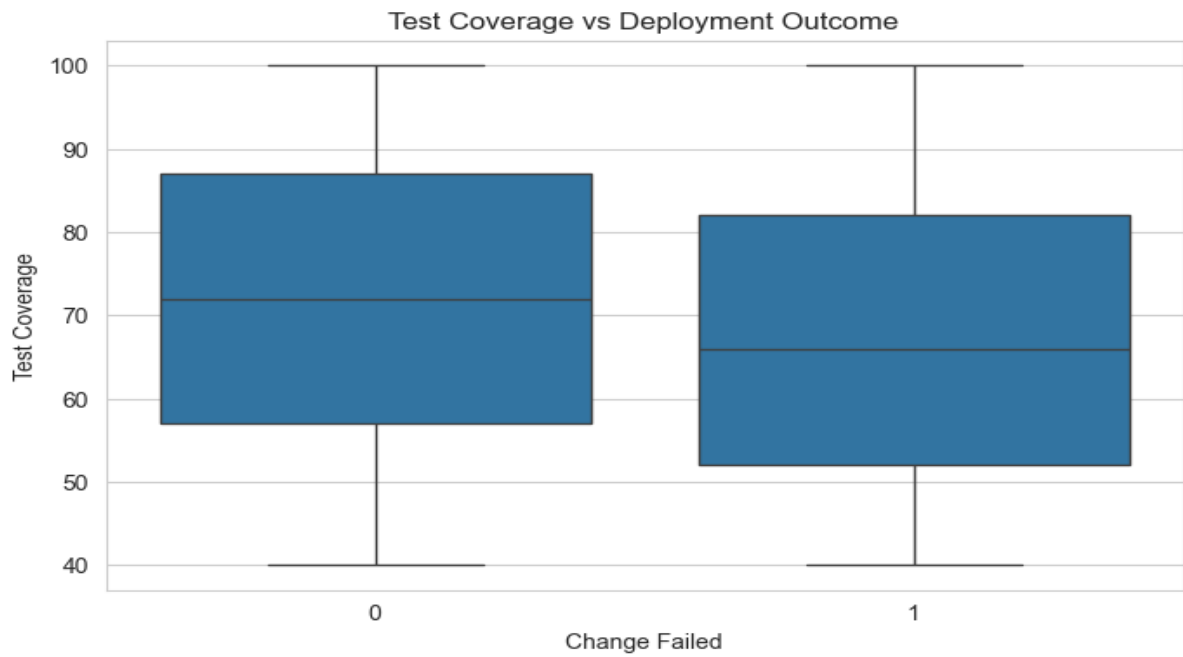

Total Records: 10000
Failure Rate: 35.0%

2. Failure Rate by Deployment Hour

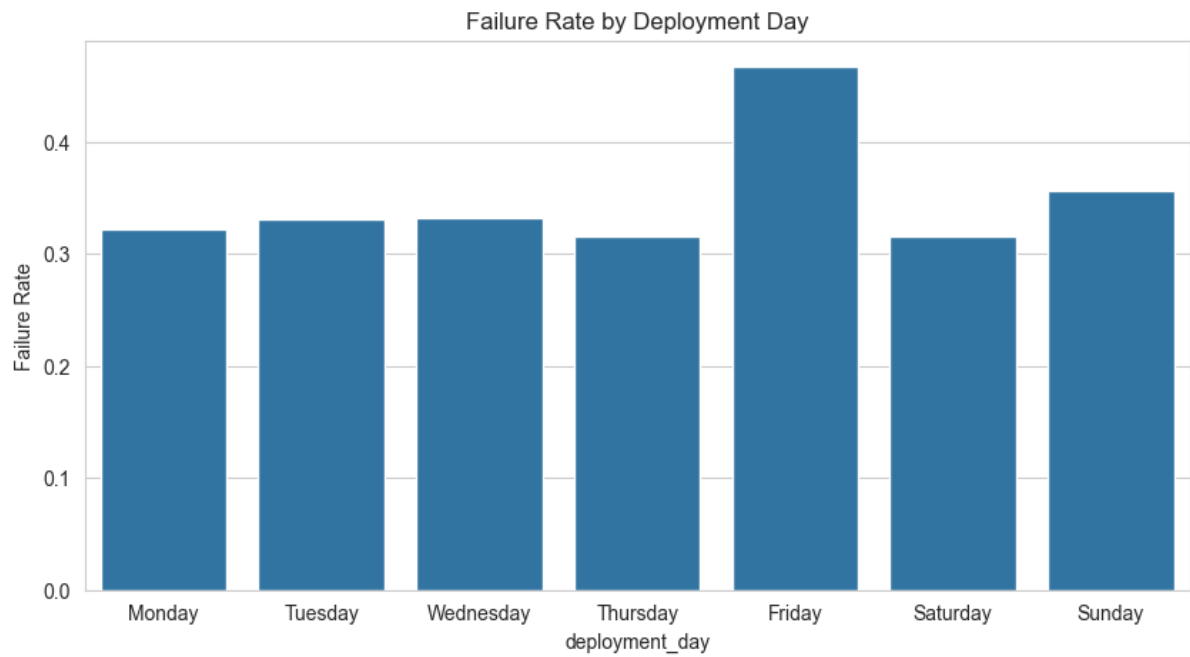

This chart shows deployment hours with the highest failure rates.

3. Test Coverage Analysis

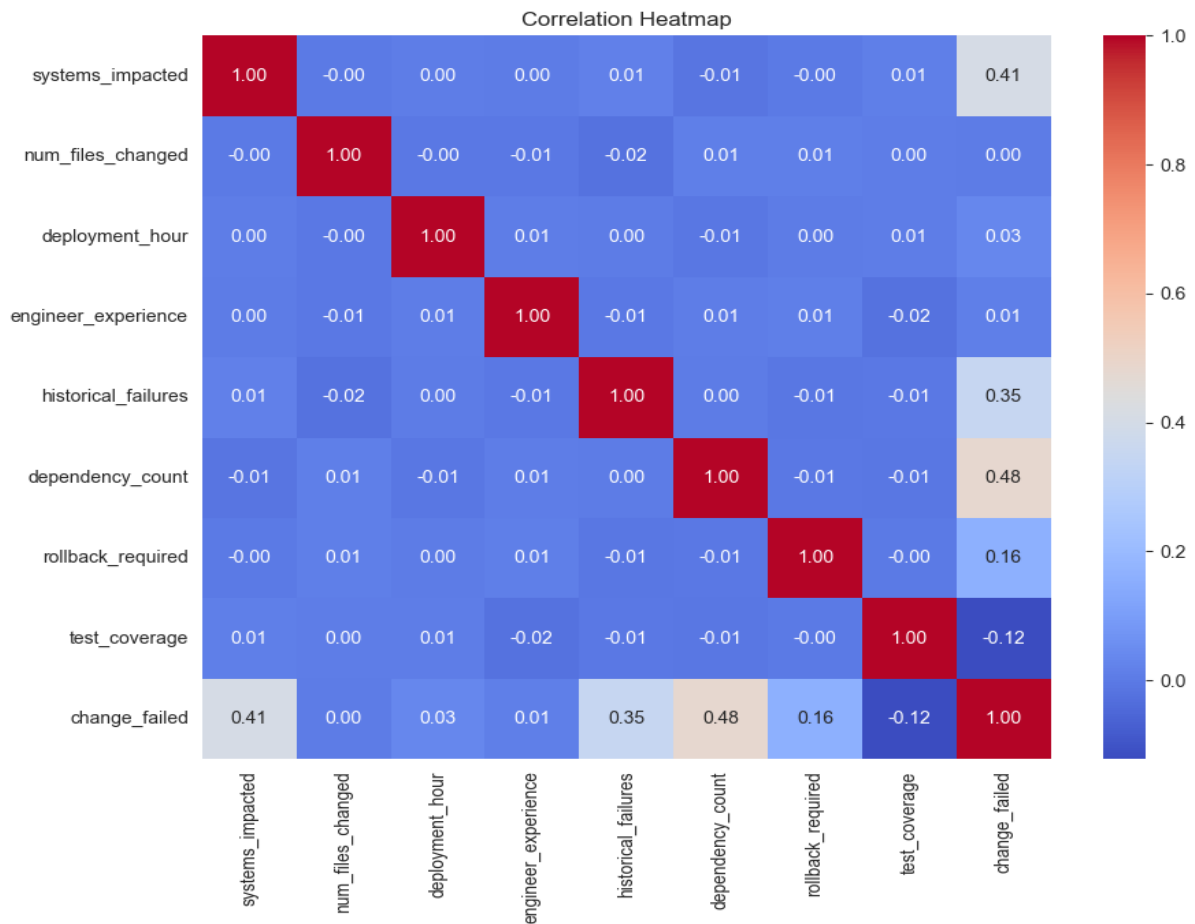

Compare test coverage distributions between successful and failed deployments.

4. Failure Rate by Deployment Day

Friday and weekend deployments may show elevated risk.

5. Correlation Analysis

The heatmap highlights relationships between numerical features and deployment failures.

6. Conclusion

Key risk factors identified during EDA:

- High dependency count
- High historical failures
- Low test coverage
- Night-time deployments
- Friday/weekend deployments
